

Relax. Everything's under control.

Now water leaks ≠ water damage

Nowa 360 detects and controls leaks. When it notifies you, the worst has already been avoided. So rest easy. And leave the house worry-free.

DETECT

Your best defence when every second counts.

Washer, water heater, dishwasher—you can install a wireless Nowa detector wherever there's a risk. At the first sign of a leak, the detector alerts the master unit.

CONTROL

Nowa stops leaks instantly, automatically.

Your Nowa control unit triggers an electric valve that shuts off the water main in a fraction of a second. The leak is stopped just like that—wherever it originated.

NOTIFY

You're notified, not alarmed.

You get a message or email to inform you that your main water valve has been safely shut off. At worst? A little puddle to mop up. Life goes on. No panic. No hassles.

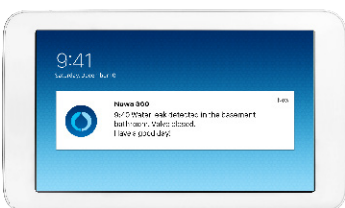

The slimmest water detector there is. It detects water with amazing accuracy.

Nowa valve is always ready to shut off the water safely, even after long periods when nothing happens.

Nowa 360 master unit centralizes a home or commercial building's smart functions.

Nowa 360's home screen controls all the smart features of your home or commercial building. It can control water, security, energy, or lights.

The **perimeter detector** is a cable that can detect water over 6-foot distance.

Mini detectors are used to extend the detection area into the tightest spaces.

Simple.

Now it's your turn.

DESIGNED WITH YOU IN MIND— INSTALLER AND USER.

Have a certified plumber install the electric valve. Wire the valve to the master unit. The rest is amazingly simple. No additional wiring, no tools. Programming can be done by either smart phone or tablet.

Be sure the valve is installed in compliance with all applicable laws and regulations.

1. Install the mobile app.
2. Install the master unit
3. Assign locations to the detectors
4. Put the detectors in place

Reliable.

It never sleeps.

ALWAYS AT WORK.

We designed Nowa 360 so you could forget it was even there. But if a water leak occurs—today or 10 years from now—it'll be stopped in its tracks. Always.

An interference-free signal

Has a range of up to 5,000 square feet

Connected valve for an immediate response

Built-in self-testing

Low battery alert

Pinpoint freeze detection

Connectivity.

Keep things in hand, wherever you are.

THE BACKBONE OF YOUR SMART HOME

Water damage is the cause of more insurance claims today than fire or theft. Nowa 360 is the only smart-home backbone system you can trust to control water leaks.

Remote control

Activated when sensors detect movement

Geolocalisation

Multiples features such as security, lights, and energy.
