

## How to change the volume of a NOWA 4S panel

### Steps to Change Panel Volume

1. Open the **Nowa Presence app** and log in.
2. Once the application is open, press on the system name you wish to adjust the sound.
3. Press on the **blue circle** with three white dots located at the top right of the screen.
4. Once the overview page has loaded, choose the **Settings tab** located at the right of the **Preview tab**.
5. In the **Settings tab**, go down to **Audio Settings**. You can **slide the button** to change the panel volume from 0-4.
6. Once the desired volume is chosen, go all the way down and press on **“update”**.
